

Phillips Academy Snyder Center / Andover, Massachusetts

**Owner:**

Phillips Academy

Architect:

Perkins + Will

Total Area:

98,800sf

Duration:

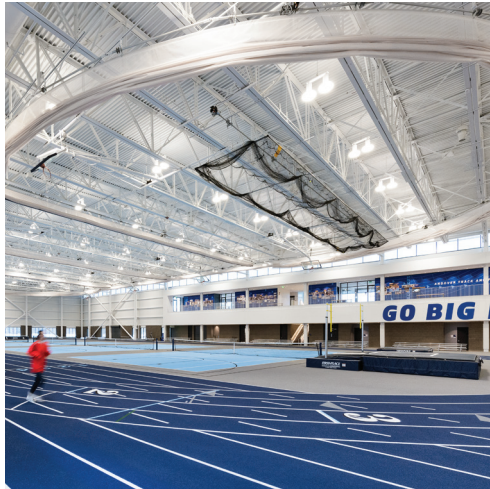

18 Months

Project Type:

New Construction

Building Use:

Athletic Center

The new Snyder Center at Phillips Academy was built on an extremely sloped site adjacent to the school's football field that remained in use throughout construction. A soil retention system was used to safeguard against collapse.

The new field house includes three basketball courts surrounded by an indoor track, 12 squash courts -- 11 regulation and one tournament grade court with viewing deck; and specialty flooring for each purpose.

The Snyder Center is the fifth project Erland has done on the Phillips Academy campus
